Senior Loan Officer Survey

on Business-Lending Practices in Canada

Results of the Second-Quarter 2010 Survey

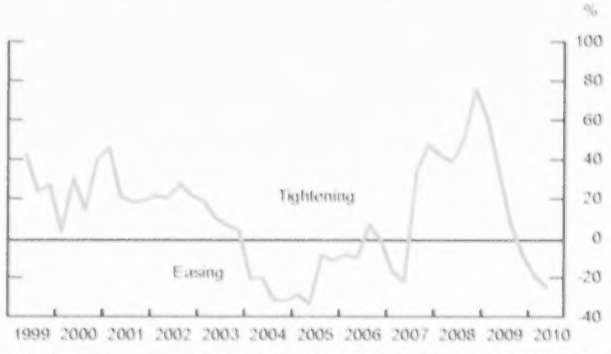
Vol. 3.2 12 July 2010

This *Senior Loan Officer Survey* (SLOS) focused on changes to business-lending practices in the second quarter of 2010.

- The survey results point to an overall easing in business-lending conditions during the second quarter of 2010 **(Chart 1)**. Both the price and non-price aspects of business lending eased during the quarter **(Chart 2)**. Note that the balance of opinion indicates only the direction of the change in lending conditions; it does not provide information on the magnitude of the change.
- Compared with the previous quarter, the easing in lending conditions is more widespread across borrower categories.
- For corporate borrowers, lending conditions eased for the fourth consecutive quarter. Increased competition among lenders and a more favourable economic outlook for these firms continue to be the key factors underlying the easing in lending conditions.
- For small businesses and commercial borrowers, the survey results point to a modest net easing in lending conditions, in price terms, during the second quarter. Notably, this is the first reported easing for these borrower categories since the onset of the credit-tightening cycle that began during the third quarter of 2007.

Chart 1: Lending conditions continued to ease for Canadian non-financial firms . . .

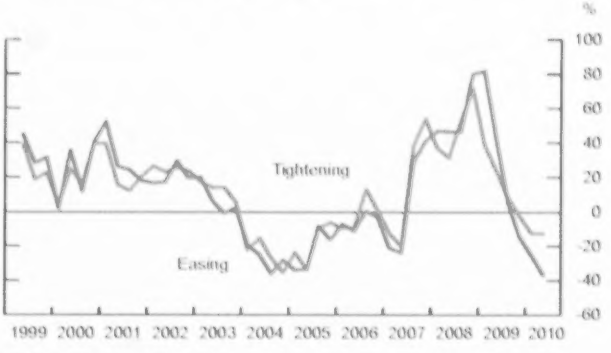
Overall business-lending conditions: Balance of opinion*



* The balance of opinion is calculated as the weighted percentage of surveyed financial institutions reporting tightened credit conditions minus the weighted percentage reporting eased credit conditions. Thus, a positive balance of opinion implies a net tightening. The chart shows the average of the balances of opinion for the price and non-price dimensions of lending conditions.

Chart 2: . . . in both price and non-price terms

Price and non-price lending conditions: Balance of opinion*



* The balance of opinion is calculated as the weighted percentage of surveyed financial institutions reporting tightened credit conditions minus the weighted percentage reporting eased credit conditions.

Note: Each series is the simple average of the balances of opinion for the small business, commercial, and corporate sectors.

The Senior Loan Officer Survey collects information on the business-lending practices of major Canadian financial institutions. In particular, the survey gathers the perspectives of respondents on price and non-price terms of business lending and on topical issues of interest to the Bank of Canada. The survey is conducted quarterly, near the end of the quarter for which the results are reported. The second-quarter survey was conducted between 14 and 16 June 2010. Additional information on the survey is available on the Bank of Canada's website at <http://www.bankofcanada.ca/en/slos/index.html>.

The survey results summarize opinions expressed by the respondents and do not necessarily reflect the views of the Bank of Canada.
